Application/Control Number: 10/005,085

Art Unit: 1775

1. The amendment filed on 9-26-03 effectively cancels all claims drawn to the elected invention and presents only claims drawn to non-elected inventions is non-responsive (MPEP § 821.03). The remaining claims are not readable on the elected invention because newly submitted claims 1-14, 25-31 and 33-42 are directed to an invention that is independent or distinct from the invention originally claimed that was elected by original presentation for the following reasons:

The originally filed claims 1-14 and subsequently filed claims 25-31 are directed to a structure having at least 3 phases with the inner and outer phases being ceramic and the intermediate layer being a metal phase.

Amended claims 1-14, 25-31 and newly filed claim 41 are now drawn to a structure having at least 3 phases, wherein the intermediate phases may be a ceramic or metal or a mixture thereof, furthermore the phases are arranged in a predetermined manner and one phase performs a non-structural function and one phase is capable of bearing mechanical loads and stresses. The claimed subject matter of the two claims would be unrelated as they have different functions, specifically, the originally filed claims do not have any functional limitations while the amended claims require that one phase is effective for performing a non-structural function as well as one phase being capable of bearing mechanical loads and stresses. Furthermore, the amended claims broaden the materials suitable for use for the intermediate phase, thus providing the newly claimed invention with a different mode of operation.

Application/Control Number: 10/005,085 Page 3

Art Unit: 1775

Newly added claims 33-37 are drawn to a structure having no particular structure wherein a first phase may be ceramic or metal and wherein a second phase is a piezoelectric or electrostrictive ceramic, however the originally filed claims recited a 3 phase structure.

Newly added claims 38-41 are drawn to a structure having at least 3 phases with an inner and outer phase being a ceramic or metal effective for functioning as a p-couple of n-couple and an intermediate phase including an insulating material. Originally filed claims recited no particular function for the phase material and limited the inner and outer phases to ceramics and the intermediate to metal.

Since applicant had received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, newly claims amended claims 1-14, 25-31 and newly submitted claims 33-42 have been withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Since the above-mentioned amendment appears to be a bona fide attempt to reply, applicant is given a TIME PERIOD of ONE (1) MONTH or THIRTY (30) DAYS, whichever is longer, from the mailing date of this notice within which to supply the omission or correction in order to avoid abandonment. EXTENSIONS OF THIS TIME PERIOD UNDER 37 CFR 1.136(a) ARE AVAILABLE.

Art Unit: 1775

2. Any inquiry to this communication or earlier communications from the Examiner should be directed to Jason Savage, whose telephone number is (703)305-0549. The Examiner can normally be reached Monday to Friday from 6:30 AM to 4:00 PM.

If attempts to reach the Examiner by telephone are unsuccessful, the Examiner's supervisor, Deborah Jones, can be reached on (703)308-3822.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703)308-2351.
